13. On October 3, 2002 the Commission granted precautionary measures on behalf of 52 persons, including two minors, who are carriers of the human immunodeficiency virus (HIV/AIDS). The beneficiaries are identified in the file; however, at their request, their identities are being kept confidential in this report. The beneficiaries alleged that in many cases they had turned to State public health systems but had not obtained assistance to undergo the tests necessary to determine how the disease is progressing or to receive the anti-retroviral treatment needed for them to survive. On January 22, 2003 the State presented a photocopy of the report of the National Program on STDs/HIV/AIDS.
