In the exercise of the powers vested in me by Article 5 of Annex 10 to the General Agreement for Peace (hereafter: GFAP), according to which the High Representative is the final authority in theater regarding interpretation of his mandate; and considering in particular Art. II.1.(d) of the same Agreement, in terms of which the High Representative shall have the power to facilitate, as he judges necessary, the resolution of any difficulties arising in connection with civilian implementation; recalling the interpretation of such a power given in paragraph XI.2 of the Conclusions of the Peace Implementation Conference held in Bonn the 10 December 1997, particularly sub-paragraph (b) thereof, in terms of which the High Representative is entitled to make binding decisions, as he judges necessary, on the adoption of measures aiming at ensuring implementation of the GFAP throughout Bosnia and Herzegovina (hereafter: BiH), including interim measures to take effect when parties are unable to reach agreement;

Considering that, subject to the responsibility of the institutions of Bosnia and Herzegovina for the allocation of frequencies for broadcasting purposes as specified by the Telecommunications Law of Bosnia and Herzegovina, Art. III.1.(h) of Annex 4, and Art. 3 of Annex 9 to the General Framework Agreement for Peace in Bosnia and Herzegovina clearly establish the possibility for the institutions of both Bosnia and Herzegovina and the Entities to establish and operate, individually or jointly, communication facilities in the form of public radio/television companies;

Bearing in mind the exhortations of the Peace Implementation Council (hereafter: PIC) in Paragraph 63 of the Luxembourg Declaration of 9 June 1998, drawing the parties' attention to the importance of a Public Broadcasting System in Bosnia and Herzegovina and urging them, in order to achieve such an objective, to cooperate with the High Representative in the restructuring of RTV BiH and the integration of the transmission system; remembering the further PIC's exhortations in Chapter V, Paragraphs 21 and 24 of the Madrid Declaration of 16 December 1998 restating both objectives with particular focus on the establishment of an integrated Federation television network fully enfranchising all communities and supported by transparent funding, and the establishment of a public corporation for broadcasting and transmission; remembering that in the above mentioned Paragraph 24, the PIC drew the attention of all parties to the GFAP to the need for foreign broadcasters such as Croatian Radio Television and Radio Television Serbia to regularize their activities in BiH according to applicable law; further remembering that on July 30, 1999, the High Representative commenced on an interim basis the process of restructuring the Public Broadcasting System in Bosnia and Herzegovina by establishing PBS BiH and RTV FBiH, their financing, and dismantling RTV BiH;

Noting that in line with the above exhortations, the Government of the Republika Srpska (hereafter: RS) signed on 13 February 1998 an agreement which established a set of interim arrangements for the restructuring of Srpska Radio Televizija (hereafter: SRT) in accordance with European standards of Public Service Broadcasting, supplemented by a further Memorandum of Understanding (hereafter: MoU) on 17 August 1998 committing the RS Government to a mechanism for transparent and reliable funding for SRT. The interim arrangements and MoU were to remain in force until such time as they could be embodied in a new law for SRT which, the High Representative instructed the RS Government in writing, was to be adopted by 31 December 1998. Also noting that a different MoU was adopted on 11 June 1998 by the Presidency of BiH, expressing a commitment to the establishment of a public radio and television service for the whole of BiH. The MoU called for the appointment of an interim Board of Governors for RTV BiH who would provide proposals for the establishment of such a country-wide broadcasting service for BiH, including an integrated transmission network, and proposals for the creation of a public broadcaster for the Federation BiH. The MoU also stipulated that these new structures were to be in place by the

end of 1998. Subsequently, legislation establishing a Federation service, based on proposals from the Board of Governors of RTV BiH, was debated by both chambers of the Federation Parliament, which were unable to agree on a final text. Moreover, since the restructuring of the Public Broadcasting System on July 30, 1999, by the High Representative no laws restructuring the public broadcast system have been enacted by the concerned governments despite their being requested by the High Representative for them. Therefore, none of the above objectives have been fulfilled, and the process begun by the High Representative must continue.

This all considered, being borne in mind and noted, I hereby issue the following:

SECOND DECISION ON RESTRUCTURING THE PUBLIC BROADCASTING SYSTEM IN BOSNIA AND HERZEGOVINA

ARTICLE 1. GENERAL

Transmitter management and maintenance staff working in the existing broadcasters shall be seconded to the ITC. The ITC's first task is to ensure that a countrywide transmission system able to meet existing demand is maintained and fully operational for the medium term.

2.1.2 The ITC may enter contractual agreements with domestic and foreign broadcasters for use of their transmitter sites and equipment when justified by business necessity. Its first priority shall be the transmissions of the Public Broadcasting System of BiH.

2.1.3 Until the ITC has its own income, maintenance costs and salary budgets, its staff shall be paid by the broadcasters according to the current Rule Books, and deployed under the instructions of the ITC Board. Income shall be achieved through Annual Service Level Agreements for programme distribution negotiated with the broadcasters. The ITC shall proceed immediately to staff the organization. In order that this be achieved, RTV FBiH and RT RS shall, at the ITC's request, transfer to ITC transmitter maintenance staff and monies currently reserved for maintenance of transmitters.

They shall work within a strategic framework, but have significant managerial independence. PBS BiH will allow operational managerial independence to its two "Service Providers", the Property Management Division, and the Technical Resource Division. The purpose of these Divisions is to achieve greater professionalism, modernisation, and significant improvements in efficiency within each of these specialized activities.

2.3 RT RS

The development of The Public Company Radio-Television of Republika Srpska Banja Luka (hereinafter RT RS) is a fundamental part of the creation of a public broadcasting system in BiH as specified by the Peace Implementation Council (PIC). RT RS will participate in the benefits and costs of this new system by making Service Level and Commissioning agreements with the other members of the Public Broadcasting System of BiH.

2.4 Shared Activities.

2.4.1 **The new broadcasters** shall concentrate upon programme making in Radio and Television, and collaborate to ensure best use of available budgets. They shall, therefore, jointly use technical resources, the RTV BiH building (hereinafter: The Media Centre), the programme production areas, and pool of news resources. It shall, for the benefit of the broadcasters, be responsible to develop and implement clear policies in property management, technical resources, and service agreements. Its first task shall be to decide on a framework of

business practices, and financial controls to govern transactions between the corporations. Business procedures, procurement practice, and financial controls must be common and transparent, and agreed by the Media Centre Board. An annual external audit of all the Board's activities is mandatory, and the cost shall be part of all contracts.

2.4.3 PBS BiH Property Management Division shall protect, maintain, repair, replace and dispose as necessary all structures, fixtures, power, heating, air conditioning, plumbing, office furnishings, restaurant, and related property of RTV BiH. It shall provide building management, and maintenance, and the whole range of house services to the Public Broadcasting System.

2.4.3.1 Users shall be charged for house services under annual Service Level Agreements. 2.4.4.2 All future technical resource acquisition shall be either digital, or compatible with the digital environment. Capital planning for technical resources shall be carried out at the level of the Media Centre Board to ensure the replacement and updating of equipment, and an agreed capital charge shall be added to all contracts to enable updating and replacement of equipment.

This ratio can be varied by agreement between the broadcasters to reflect changes in the levels of Subscription Fee collection, or other income, or demands caused by the development of the PBS schedule and programme mix. All other terms and conditions in Article 2 of the Restructuring Decision are abrogated. These arrangements shall obtain until the coming into force of the Law on the Public Broadcasting Service of BiH which will establish a method of collecting PBS BiH Fees.

Financial management of all the corporations shall be transparent, and publicly accountable in all respects.

2.5.6 The subscription fee collection process must be examined by audit. This audit shall take place every six months at the end of each official accounting period. It shall ascertain the true cost of the collection process, and the exact amount of fees collected. All decisions with regard to the Subscription Fees, whether political or operational shall be based upon these findings. Director of Finance, PBS BiH, shall appoint the Auditors.

2.5.7 Broadcasting subscription fees shall not be taxed.

2.5.8 The public broadcasters will need to retain advertising income at the average level for the European public broadcasting sector for the foreseeable future. New regulations shall be formulated by the IMC after consultation with the broadcasters and with the Broadcasting Agent of the High Representative. Secure and stable funding is a fundamental requirement in this sector; and the broadcasters' viability will depend upon a strong income from advertising for the foreseeable future. Every effort should be made to avoid barter agreements, and to obtain actual revenue.

2.5.9 All corporations shall, according to international accounting standards for public broadcasters or corporations, have the same standard accounting and depreciation definitions and practices. They shall end their fiscal years on the same day of each year, and exchange reports of quarterly and annual balance sheets, income statements, cash flow statements, and actual expenditure versus budgeted expenditure on the same days of each year.
